# TakeAHike.com

By Vinnie

# Code

```
overflow-x: auto;
overflow-y: auto;
```

Overflow property was essential in formatting leaderboards, map navigation, and feeds.

Box-shadow achieved a Wii-U type interface

```
box-shadow: 0px 0px 10px 5px rgba(138, 27, 27, 0.488);
```

# Next Steps

- Add account functionality
- Make the map actually interactive
- Create better icons than emojis
- Make search function actually work
- Maybe add a forums section
